of Bulbs, Plants
and Seeds for
1918

The Original Boston Fern, *Nephrolepis Bostoniensis*. Its freedom of growth without essential care has made it popular with admirers of beautiful house plants. 20c, 35c, 60c.

The Grand New Dwarf Fern

"Teddy Jr."

This magnificent Fern is a sprout from the now famous Roosevelt Fern, and while it produces a shorter frond it retains all the valuable characteristics of the parent. Fronds are broad and beautifully tapered from base to tip; they droop just enough to make a shapely, graceful plant, permitting it to finish with fine full center and perfect symmetrical spread. The pinnae are distinctly undulated, giving the fronds an attractive wavy appearance, which adds to their charming decorative effect. It is such a compact, vigorous grower that it will thrive under most adverse conditions. Young plants, 20c; strong plants, 35c; extra strong plants, 60c.

THE PLUMED FERN.

Scholzeli

With the recent introductions of Ferns which have come from the original Boston type, there is no variety with heavier and more plummy fronds than Scholzeli. Its foliage is quite different from all other varieties of the family, and stands in a class by itself. The plant makes a comparatively dwarf compact growth, the fronds, while dense, firm and rigid, are still graceful as the illustration shows. The foliage is also of a darker green than the original Boston Fern. All in all, it forms an ideal plumed Fern, possessing all the merits of former introductions while having a distinctive character that makes it of especial value. Price, nice shapely plants, 20c; larger size, 35c and 60c.

SPECIAL NOTICE — Owing to war conditions and the difficulties and uncertainties surrounding importations of such bulbs as Hyacinths, Tulips, Narcissus, etc., from Holland, we are not offering them in this catalogue as usual. The stock we offer this fall is confined to Bulbs, Plants, Shrubs, and Seeds of our own growing or such as are produced in this country. Distributing the product of one of the largest plant producing establishments in the United States, we solicit a share of your patronage for the fall of 1918. Very respectfully,

The Boston Fern

"No Single Decorative Plant has ever proven more popular."

This Fern is one of the best known varieties grown, and in the long years of its cultivation has proven worthy of a place in every home. Called the Fountain Fern, for its exceptionally graceful habit of growth, and until the introduction of other types was considered the most valuable house plant to be had. It is of easy culture and a very rapid grower, producing fronds of unusual length, frequently measuring six to eight feet in length. Its unusual freedom of growth without especial care has made it popular with all admirers of house plants, and although there have been many new introductions from this the parent plant, it is still the most popular variety in cultivation. Price, nice young plants, 20c each; larger plants, 35c and 60c each.

The Best All-Round Plant Grown

THE IDEAL FERN ROOSEVELT

A Notable and Valuable Novelty.
Wins Prizes Everywhere.

The popular Boston Fern has had the most phenomenal sale of any decorative plant grown. Fronds broad and heavy, often measuring 6 in. or more across, and five or six feet long. Owing to the weight of the foliage, the plant assumes an exceedingly massive yet graceful appearance, and owing to the fullness of the fronds even small plants make much more symmetrical and beautiful plants than the popular Boston Fern. The divided pinnae or miniature fronds which are so gracefully arranged, keep growing constantly, overlapping each other and showing two shades of green, while the center and main part of the frond is rich dark green, the contrast producing a beautiful effect.

We offer well established plants at 20c each; 3 for 50c, postpaid; strong plants, 35c each; 3 for 80c, postpaid; larger plants, 50c each; 3 for \$1.30.

While fronds are broad and heavy, plants have a graceful appearance. Wonderfully valuable on account of its easy culture and hardiness. Its distinguishing characteristics are its dark green foliage, its dense and compact growth and its irregular shaped fronds, which are heavily imbricated, the pinnae overlapping and so formed as to resemble miniature ferns.

THE OSTRICH PLUME FERN

Whitmanii

Fronds as Feathery as Ostrich Plumes

Whitmanii is one of the few feathery foliage Ferns which every one can succeed in growing. It is a healthy, vigorous grower, constantly unfolding fresh fronds, which often attain a width of twelve inches. Each frond is delicately and finely cut, possessing such elegance of form and willow grace as to be compared to a beautiful ostrich plume. Its feathery, drooping form and compact, luxuriant growth will make the most sordid surroundings assume cheerfulness and verdant beauty. In decorative effect it far outdistances many of the other varieties of the family. It has taken gold medals wherever shown. Price, young plants, 20c; 3 for 50c; strong plants, 35c; extra strong plants, 50c.

Hardy Ferns for Shady Places

These graceful and universally popular plants are of easy culture and afford a wide range of possibilities. A shady nook where the soil is moist and the drainage good will prove an ideal location, especially if a liberal amount of leaf mold or woods earth is available; and better still, if rocks and stumps may unite in breaking the monotony of the ground's surface. Under such conditions Ferns require very little attention and amply repay in satisfaction and genuine pleasure. 30c each; 3 for 80c; 6 for \$1.50; \$2.48 per dozen, by express only.

SPECIAL OFFER—We will send postpaid one each of the Ferns on this page (not including the Hardy Fern), in the small size, three in all, for 49c. One each of the three Ferns on this page, in the medium size for 89c. One each of the four Ferns in the largest size for \$1.24.

Popular Decorative Plants

Lace Fern

One of Most Beautiful and Popular Foliage Plants of the Century.

A Decorative Plant of Unusual Value.

(*Asparagus Plumosus*) — The family of *Asparagus* plants comprises a number of varieties. Some are climbers, some drooping or trailing, some erect and bushy. Many of them are highly prized for their beautiful and graceful foliage, and the two varieties which we list on this page are practically the most popular and valuable of all. The variety *Plumosus* (*Asparagus Plumosus*) is a tall, climbing, decorative plant and one of the rarest and of delicate beauty. Its bright green foliage is extremely fine and plume-like. The fronds grow from six to eight inches in width and when cut retain their color and shape for weeks. The plant may be grown as a pot plant, a bushy form or climbing. Florists grow the *Asparagus Plumosus* to give them rich green strings of foliage to be used similar to the popular *Smilax*. *Asparagus* possesses the advantage of being more graceful and its foliage finer than those of the most delicate Fern. As a house plant it will thrive under practically all conditions. The *Asparagus* likes a good rich soil and fairly warm temperature. The plant does best and carries the richest color of foliage when it is kept in a growing condition through a plentiful supply of nourishment. *Asparagus* is comparatively free from diseases, and with all its good qualities and practically no bad ones, it ranks as one of the first decorative plants to be had. Nice young strong growing plants, 20c each; 3 for 50c. Larger plants 35c; 3 for 85c.

J. K., Brooklyn, Ill.: "The Ferns you sent me are surely beauties and are doing very fine."

Asparagus Plumosus (Lace Fern)
Foliage of richest green, 20c, 35c.

Feather Fern

Unsurpassed for Window Boxes or Hanging Baskets.

Foliage Graceful and Drooping Dense Glossy Green.

(*Asparagus Sprengerii*) — The *Asparagus Sprengerii* gives us a plant of the bushy and drooping form of the *Asparagus* family. The foliage is composed of dense, glossy green, graceful and drooping branches. The Feather Fern or *Asparagus Sprengerii* is probably of a hardier nature than the *Plumosus*, and subjects itself to wider usage. It is especially valuable for window box and hanging basket planting, for vases and as specimens when grown in pots or as tub plants. The Feather Fern or *Asparagus Sprengerii* gives us a more valuable house plant, being one of easy culture, the sprays growing four to five feet long, and when the foliage is used for cut flower work it retains its freshness for an unusual length of time. The Feather Fern is particularly free from troublesome insects or diseases, and in this has one advantage over the large family of decorative Ferns of the Boston Fern type. The plants are of rapid growth, succeeding well in ordinary rich soil, and there is every reason to believe that all plant growers can have the greatest success with them. Price, nice strong growing young plants, 20c each; 3 for 50c; \$1.50 per dozen. Strong plants, 35c each; 3 for 95c.

F. C. S., Augusta, Ga., says: "The Ferns purchased of you last spring are wonderful, the admiration of all who see them."

Asparagus Sprengerii (Trailing Basket Fern), Sprays three to four feet long. 20c, 35c.

Dr. C. R., Round Lake, Ill.: "I have dealt with you for the past ten years with satisfaction."

H. S., Abilene, Tex.: "The plants received from you give better satisfaction than any ordered elsewhere."

The combination of colors embraces striped, spotted, bordered and fringed; in rainbow colors, with rich, velvety textures. Pansy plants, planted in the spring as soon as the frost is out of the ground, will begin to bloom at once, and afford daily pleasure. Children's Ideal Flower Bed

The Pansy forms the ideal flowering plant for children. It is their choice flower, easy to grow and always in bloom. There is a growing interest in the garden by children. The work is unequalled for physical development and forms its part in character building. The matter is receiving the attention of schools through teachers as well as from parents, and it should receive the hearty co-operation of all. All children should be helped and everything possible be done to promote and develop their gardening interest, and in no way can a better start be made than through a Pansy bed, which can be had for 35 cents.

DOUBLE AND SINGLE Sweet Scented VIOLETS

It is a beautiful flower, popular with all, and of easy culture, doing well in any good, rich soil.

(Hardy June Rose.) The National Rose Society has set the stamp of approval upon His Majesty by awarding it the Gold Medal. The color is a fine dark crimson, shaded deep vermilion-crimson, on the edges, frequently overlaid with a rich velvety shading, the whole flower resembling that beautiful color seen in Duchess of Bedford. It is a strong, vigorous grower, carrying its flowers upright; the blooms are full, of great size, having wonderful substance and depth of petal, with high pointed center of the ideal exhibition type. When seen at its best this is a noble flower, and is also one of the sweetest perfumed Roses in cultivation. There should be a few of these Roses in every garden. Highly recommended by all who know it. 22c each; 3 for 54c; 2-year 44c each; 3 for \$1.28.

The planting of shrubs is an important feature in the adornment of any grounds. They may be planted individually or collectively, and but few of them are really required to add to the beauty and value of property, and at the same time contribute to the pleasure and interest of the home. Probably the most effective arrangement of shrubs is irregular groups or arranged against buildings, fences or property lines or as planting along walks or drives. Our collection is a practical one and the plants we offer are healthy and vigorous.

Hydrangea Arborescens

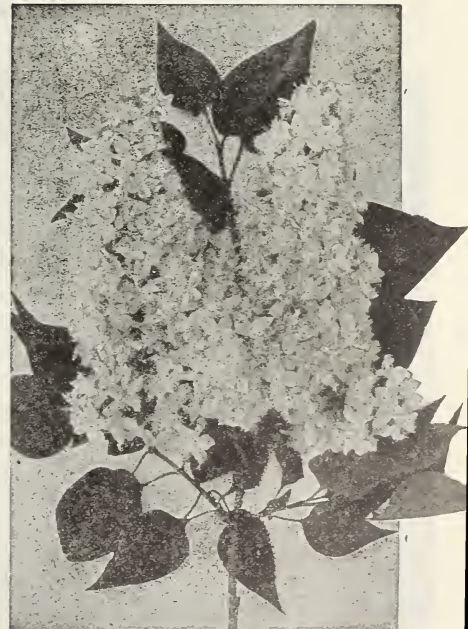

Grandiflora Alba (Hills of Snow)—(Four to eight feet.) This beautiful hardy American shrub is the finest addition to this class of plants found in many years. The blooms are very large, of pure snow-white color, resembling a little the hardy so well known, the Snowball, in color and make-up, only they are much larger in size and much more striking. One of its most valuable features is its coming into bloom just after the passing of all the early spring shrubs, while its long season of bloom, from early in June through August, renders it a valuable plant not only to the florist, but to the owner of every garden. It is perfectly hardy, standing twenty degrees below zero. By express, 15c each; 3 for 40c; \$1.50 per dozen. Strong plants, 25c each; 3 for 60c; \$2.40 per dozen. THE SENSATIONAL DECIDUOUS SHRUB,
BUDDLEYA VARIABILIS MAGNIFICA.

Ever-Blooming Butterfly Bush

(Summer Lilac)—Free flowering. Blooms all summer. The Buddleya or Everblooming Butterfly Bush was one of the show plants of the San Francisco and San Diego expositions. It attracted unusual attention and was greatly admired by thousands. The Buddleya is a deciduous bush, dying down in the winter. In the spring the top should be cut off quite close to the ground. The blooms come from the new wood produced through the summer. Buddleya is one of the most valuable plants either for border or specimen planting, blooming as it does late in the season, and continuing in bloom from the latter part of June until nipped by frost.

It is very rapid growing, and two years will make a large spreading bush, four to six feet high. It produces long, graceful stems which terminate in tapering panicles of beautiful lilac-colored flowers that are of miniature size and borne by the hundreds on a flower head which is frequently ten inches long. A single plant the first season will throw out as many as fifty flower spikes, which increase greatly in number during succeeding years. We recommend covering the roots with manure, leaves or other suitable material as winter approaches. Price, good strong plants 25c each; 3 for 60c, postpaid; by express, 20c each; 3 for 50c. Large field grown plants 50c each; 3 for \$1.25.
